

Some words regarding the secret bonus:

Besides making hard and dark music, I like to write. And, just as most metal heads do, I like my stories dark and gritty. Thus, I figured that this could apply to you, too. So I included the first volume of my post-apocalyptic six book series «The Gospel of Madness» into this download.

In case you like it, you can find more of my work over on [Amazon](#).

But a word of warning: If I had to put a trigger warning on my stories, in most of them I had to check each and every box. So please, only read it if you can stand graphic violence, blasphemy, cursing, twisted erotic content and characters with poor morals. ;-)

In case you find typos or other oddities in this book, please report them to Rezension@Bloodword.com via email.

A few words on that:

I am German (as you by now surely know) and at this point I do my translations myself, simply because I can not afford a professional to do them. I do them to the best of my abilities, but it is possible some minor f*****s slipped through. Reporting typos, wrongly used idioms and clumsy grammar really are of great help to me. Be sure I gratefully will look into every single message regarding the matter.

Besides that, if you enjoyed the book, writing a brief review and spreading the word really would help me a great deal.

Many thanks in advance!:-)

Sincerely

Georg Bruckmann
